PitchSync - pitchsync.ng

Three60 - three60.netlify.app

Tandem Trivia - ten-trivia.netlify.app

I am an inventive, creative, and enthusiastic frontend engineer with years of experience utilizing web technologies to design and develop digital solutions[products] for start-ups and businesses. I am currently building [PitchSync](#) and co-founded [Assistant Marketer](#).

EXPERIENCE

Lead Software Engineer — Varens Technologies

APR 2022 - JAN 2025 | Lagos, Nigeria (Hybrid)

- Led a team of 8 developers in developing the [Foodbay](#) product, which included 3 mobile and 2 web applications, to manage seamless logistics in Canada.
- I led the frontend team of 3 intermediate developers in developing a device-care feature on [MTN Picknfix](#) and [Airtel Picknfix](#), two leading service providers in Nigeria with over 100 million customers.
- I was responsible for developing [Picknfix UK](#), a platform that provides seamless device repairs for customers in the United Kingdom.
- Developed [Ticketsir 2.0](#), featuring a new user interface, event hosts' subdomain, and event ticket purchase functionalities.
- Handled and implemented the Ticketsir widget, which is used by third parties such as [CoKobar](#).

Front End Engineer — Verified Creators

DEC 2021 - JUN 2022 | Lagos, Nigeria (Remote)

- I developed [VerifiedCreators 1.0](#), featuring a new user interface, a creator's unique profile link for each user, an NFT marketplace, and more, which led to an over 40% increase in customer conversion in less than a year.
- Implement SEO across all pages, utilizing NextJS's server-side rendering and incremental static regeneration, with unique meta cards that include creator details, compatible with all major social media platforms.
- I implemented a widget that third parties could use to verify their customers on their platform.

Front End Developer — My Dues

JAN 2021 - OCT 2021 | Lagos, Nigeria (Remote)

- Communicated with the UI designers to provide UX best practices designs for implementation. I worked closely with my teammates to improve the UI and functionality of the company website.

VOLUNTEERING

Frontend Development Teacher — MAMIT

DEC 2021 - JAN 2022 | Ondo, Nigeria

I taught selected candidates the basics of front-end development and web accessibility.
